

Legal Technology

برنامج التكنولوجيا القانونية

An integrated programme for lawyers keeping pace with the digital age. Learn AI in law, smart contracts, blockchain and data protection.

training hours

24

Delivery

In-person / Live online / Blended

Fees

950 USD

Programme code

LEGALTECH

Who should attend

- Lawyers and consultants wishing to keep pace with digital transformation
- Law firm and legal department managers
- Data protection and technical compliance officers
- Law students interested in technology and innovation

Entry requirements

- A legal background: lawyers, advisers and managers of law firms or legal departments, data protection officers, or law students
- No prior technical or programming knowledge is required; the programme covers computer basics and programming logic from the start
- Ability to read technical terminology in English; lectures are delivered in Arabic

What you will learn

- Using AI tools responsibly in legal research, drafting and review
- Understand data protection regulations and apply them in legal practice
- Understanding blockchain and smart contracts and their impact on intellectual property
- Running a digital law office: case management systems and electronic signatures
- Evaluating legal technology tools and selecting those suited to the organisation

What the fee includes

- 24 training hours in evening lectures
- Programme course material covering 8 key areas of legal technology
- Practical demonstrations of using AI for contract analysis and a smart contract drafting workshop
- A closing workshop to develop a digital legal project with practical feedback
- Accredited certificate of completion from Metropolis Training Institute

- For online and blended training: access to the Metropolis learning platform and lecture recordings for review

Assessment and certificate

- **Assessment method:** Participants are assessed through attendance and participation in the practical demonstrations, the smart contract drafting workshop and the data protection case study; the programme concludes with a workshop in which each participant designs and presents a digital legal project and receives practical feedback.
- **Certificate:** Accredited certificate of completion from Metropolis Training Institute (24 training hours), issued digitally with the option of requesting a printed copy.

Course outline

Fundamentals and Digital Transformation

- The impact of technology on legal work, with practical examples.
- Challenges relating to privacy and data protection.
- Basic concepts of computer science and programming logic.
- Electronic networks and their impact on legal environments.

Artificial Intelligence and Data Protection

- Principles of artificial intelligence and machine learning.
- Practical applications in research and contract analysis, and the leading tools.
- Individuals' fundamental data protection rights.
- Comparison of legislation (Jordanian, Saudi, Iraqi) and case studies.

Blockchain and Intellectual Property

- Blockchain concepts, encryption and applications in notarisation.
- Drafting smart contracts and their associated legal challenges.
- Protecting software, copyright and patents.
- Open-source software challenges.

Business Environment and Innovation

- Start-up incorporation and legal requirements.
- The lawyer's role in compliance and protecting intellectual assets.
- Devising and presenting legal technology solutions.
- Receiving practical feedback to develop projects.
